

# Let's sort it out!

**Kilburn Vale Estate is finding new ways to help separate our waste to increase recycling and save money.**

It is £50 cheaper per tonne to recycle rather than dispose of waste. If we can increase the amount of waste that can be recycled then we can reduce the financial and environmental costs of waste disposal, saving the money we spend on waste to spend on other services.

If waste materials are not separated then they cannot be recycled cost effectively. Similarly, food waste cannot be composted if it contains non-organic materials like plastic bags and packaging.

**Get involved in designing better ways of recycling in Kilburn Vale Estate.**

Come and share your views and experiences on rubbish disposal and recycling at a public meeting on

**Wednesday 27th January 2016, 6.30pm – 8pm at:**

**Sycamore Hall  
Sycamore Court  
27a West End Lane  
London NW6 4QJ**

**Workshop participants will receive shopping vouchers in appreciation of their involvement**
